## Application for Mineral Mine Plan Revision or Amendment

Operator:	C.E. BUTTERS REALTY & CONSTRUCTION	
Mine Name:	TOWERS SAND & GRAVEL LMO	File Number: M/057 6006

Provide a detailed listing of all changes to the mining and reclamation plan that will be required as a result of this change. Individually list all maps and drawings that are to be added, replaced, or removed from the plan. Include changes of the table of contents, section of the plan, pages, or other information as needed to specifically locate, identify and revise or amend the existing Mining and Reclamation Plan. Include page, section and drawing numbers as part of the description.

Re: Operations plan update 11-30-2015

Section 106.2 is amended as follows

Section 106.2: - Type of operation conducted:

This is a Sand and Gravel operation including  
Excavation of Bank runs - Crushing & Screening, Blasting, and also Recycling  
In the future we plan to have both portable concrete and portable asphalt plants  
(provision included in Surety calculations)

*Types of operations will include blasting, hauling, crushing, screening, loading, and transport of saleable products off site. Additional operations within the permit area, conducted for periods of time as needed, include recycling of fill material including concrete with or without embedded metal, recycling of asphalt, and manufacturing of concrete and asphalt using portable concrete and asphalt plants. In addition, certain areas may be used for contaminated soil land farming authorized by other permitting agencies.*

#### Operation Practices

- 1) There are no shafts or tunnels
- 2) The site is fenced to prevent unauthorized access or injury.
- 3) All fences and gates have clearly posted no trespassing signs and applicable warnings.
- 4) Drainage channels are piped or rip rapped to reduce erosion
- 5) Fuel is stored in tanks. Fuel tanks have containment berms (capable of containing 110% of capacity) in case of leakage.

Have the land, mineral and adjacent land owners been notified in writing?

No. no notification has been given for expanding permit – Mine has been in operation for more than 100 yrs. It has also been decided in court that this operation is a nonconforming use, Also Staker Parsons is an adjacent Sand and Gravel operation of near identical operation. Numerous notices have been sent to all surrounding property owners during the course of 20+ yrs of zoning changes/disputes, conditional permits, public hearings on land use, zoning, nonconforming use etc.

We have also had a small mining permit for more than 15 years,

Does the Permittee / Operator have legal right to enter and conduct mining operations on the land covered by this notice? Yes – This mine has been established through numerous court cases as a legal non conforming use. Towers began operations as early as 1902. Various aspects of Pleasant View City's new and revised ordinances are being challenged in court.

#### Operation Plan

Minerals to be mined: Sand and Gravel products from both alluvial deposits and fractured bedrock. Products include: Sand, Landscape rock 2' to 16', 3/8" to 4" Gravel, 3/4" to 2" road base, railroad ballast, Clay, Alluvial fills and bank runs, 2" to 8" engineered fills, 6" to 2' rip rap and others per market conditions.

#### ~~106.2 Type of Operation Conducted:~~

~~This is a sand and gravel operation including  
Excavation of Bank runs, Crushing & Screening, Blasting, and also recycling,  
In the future we plan to have both portable concrete and portable asphalt plants~~
